

Graph and Chart Skills

Comparing Climate Graphs

Climate graphs enable you to compare climates in different cities. The climate graphs below show the different climate patterns of Seattle, New Delhi, and Paris.

Directions: Study the climate graphs, and answer the questions that follow.

Line graphs show temperature. Bar graphs show precipitation.

A. Temperature

- Which city has the greatest annual range of temperatures? _____
- What is the warmest month in New Delhi? _____
- What are the two coolest months in Seattle? _____

B. Precipitation

- What is the rainiest month in New Delhi? _____
- Approximately how many inches of rain fall in that month? _____
- In which city is precipitation most even throughout the year? _____
- Which city has the highest total precipitation? _____

C. Comparing climates

- Which city has the most variable climate? _____
- Describe the climate of Paris.
